

Instructions for use HUMIN PLUS for Fruit Trees

Use of HUMIN PLUS for the treatment of fruit trees and shrubs.

Recommended processing phases:

- In the spring and 2 to 3 times during the season and before the winter.
- HUMIN PLUS is diluted in water in a ratio of 1: 500 (20 ml per 10 liters of water) and used as a soil treatment at the rate of 15 litres per tree, 3 to 5 litres per shrub, 0.5 litres per herb.
- In the budding stage – HUMIN PLUS is diluted in water at a ratio of 1:1000 (10 ml per 10 litres of water). Plants should be sprayed until thoroughly wet.
- In phase of beginning of fruit growth - HUMIN PLUS is diluted in water at a ratio of 1:1000 (10 ml per 10 litres of water). Plants should be sprayed until thoroughly wet.
