

Instructions for use HUMIN PLUS for Industrial Crops

Use of HUMIN PLUS for the treatment of perennial and lawn grass.

Recommended processing phases:

- Soaking of seeds – HUMIN PLUS diluted in water in a ratio of 1: 50, seeds to be soaked in the solution. Soaking time - 1 min. to 1 hour. The seeds are then dried. Seeds should be sown not later than 180 days after treatment.
- On grass HUMIN PLUS should be processed in the evening. HUMIN PLUS is diluted in water in a ratio of 1: 1000 and sprayed before rain (solution rate - an average of 10 liters per 25 square meters). Treatment is recommended every 20 to 25 days.
- For perennial herbs it is recommended after cutting process and then every 20 to 25 days.
