

Instructions for use HUMIN PLUS for Potatoes

For processing potatoes recommend the following procedure:

- 1. Before planting, prepare a solution of 1:50 (1 liter of water 20 ml of HUMIN PLUS), and spray the solution on the potatoes intended for planting. Stand for 1 hour, then plant.
- 2. After the appearance of 5 to 7 leaf shoots spray with a solution HUMIN PLUS (1:1000 concentration - 1 liter of water 1 ml HUMIN PLUS). , pour remainder of the solution under plants.
- 3. Second treatment using a solution (1:1000 - 1 liter of water 1 ml HUMIN PLUS) applied during the beginning of flowering of the potatoes.
- 4. It is recommended to further treat 3 to 4 weeks after the second treatment.
